

# SMS Health

PanHealth is a healthcare technology and disease management services company. PanHealth's products and services are bundled under a brand name of "Compliance Engine". Various stakeholders in healthcare namely Health Plans, CMS (Medicare and Medicaid), Pharmaceutical Companies, Employers and Care Givers are trying to solve the problem of patients not complying with physician prescriptions and good health practices (GHP). The products developed by PanHealth are high tech, yet automatic and extremely easy to use by the consumers.

This very line of thought gave birth to our new technology "SMS Health".

As wireless communications has become an ever-more important and prominent part of everyday life, dramatic growth has been seen in the use of mobile phones and other portable products. We at PanHealth explored the idea of managing your Health information using your everyday mobile technology!

PanHealth Inc presents SMS Health!

# SMS Health Workflow

## Data Input by patient

## Data retrieval by patient

This means that patient health information can be displayed or communicated by the above means to any individual who might be part of patient healthcare group.

Patient/ Physician affiliation with PanHealth's SMS Health grants a user name and password. This enables patient to log onto PanHealth's remote database where using secure login's and passwords the patient, patients' family or patients' physician may retrieve patients' health records.

Its easy to get affiliated with our process. We feed patient information on our server and pre-set reminders or information can be routed through patients' mobile device to patients' personal PanHealth account and even patients' Physician's office!

# SMS Health

## *SMS Health for Patients*

SMS Health envisions a world where all the individuals concerned with your health like your family, care givers, doctors etc are informed, connected and empowered with your health information by delivering a service that is dynamic and interactive. SMS Health can help you conceptualize, realize and extend the value of your seamless Health Information usability.

Further, PanHealth's Support Services focuses on performance, both technological and operational, to maximize the efficiency and security of your existing networks. SMS Health services can help you increase both the availability and the operating efficiency of your health networks, while effectively maintaining your privacy and security of Information.

## *SMS Health for Physicians*

Physicians are often asked to be "gatekeepers," determining their patients' access to medical therapies and technologies. At the same time, most physicians have been taught that they should act as patient advocates, pursuing patients' best interests.

It becomes the goal of SMS Health to provide effective initiatives at the level of the health care system. The potential of SMS-based health information to lead to better physician-patient communication and patient outcomes could be facilitated by promoting physician acknowledgment of increasing use of the technology among patients and by developing patient management guidelines. What better way than to adopt PanHealth's SMS Health!
